

These are
filter buttons
(usage
explained
later)

This opens up
a modal which
create a ticket

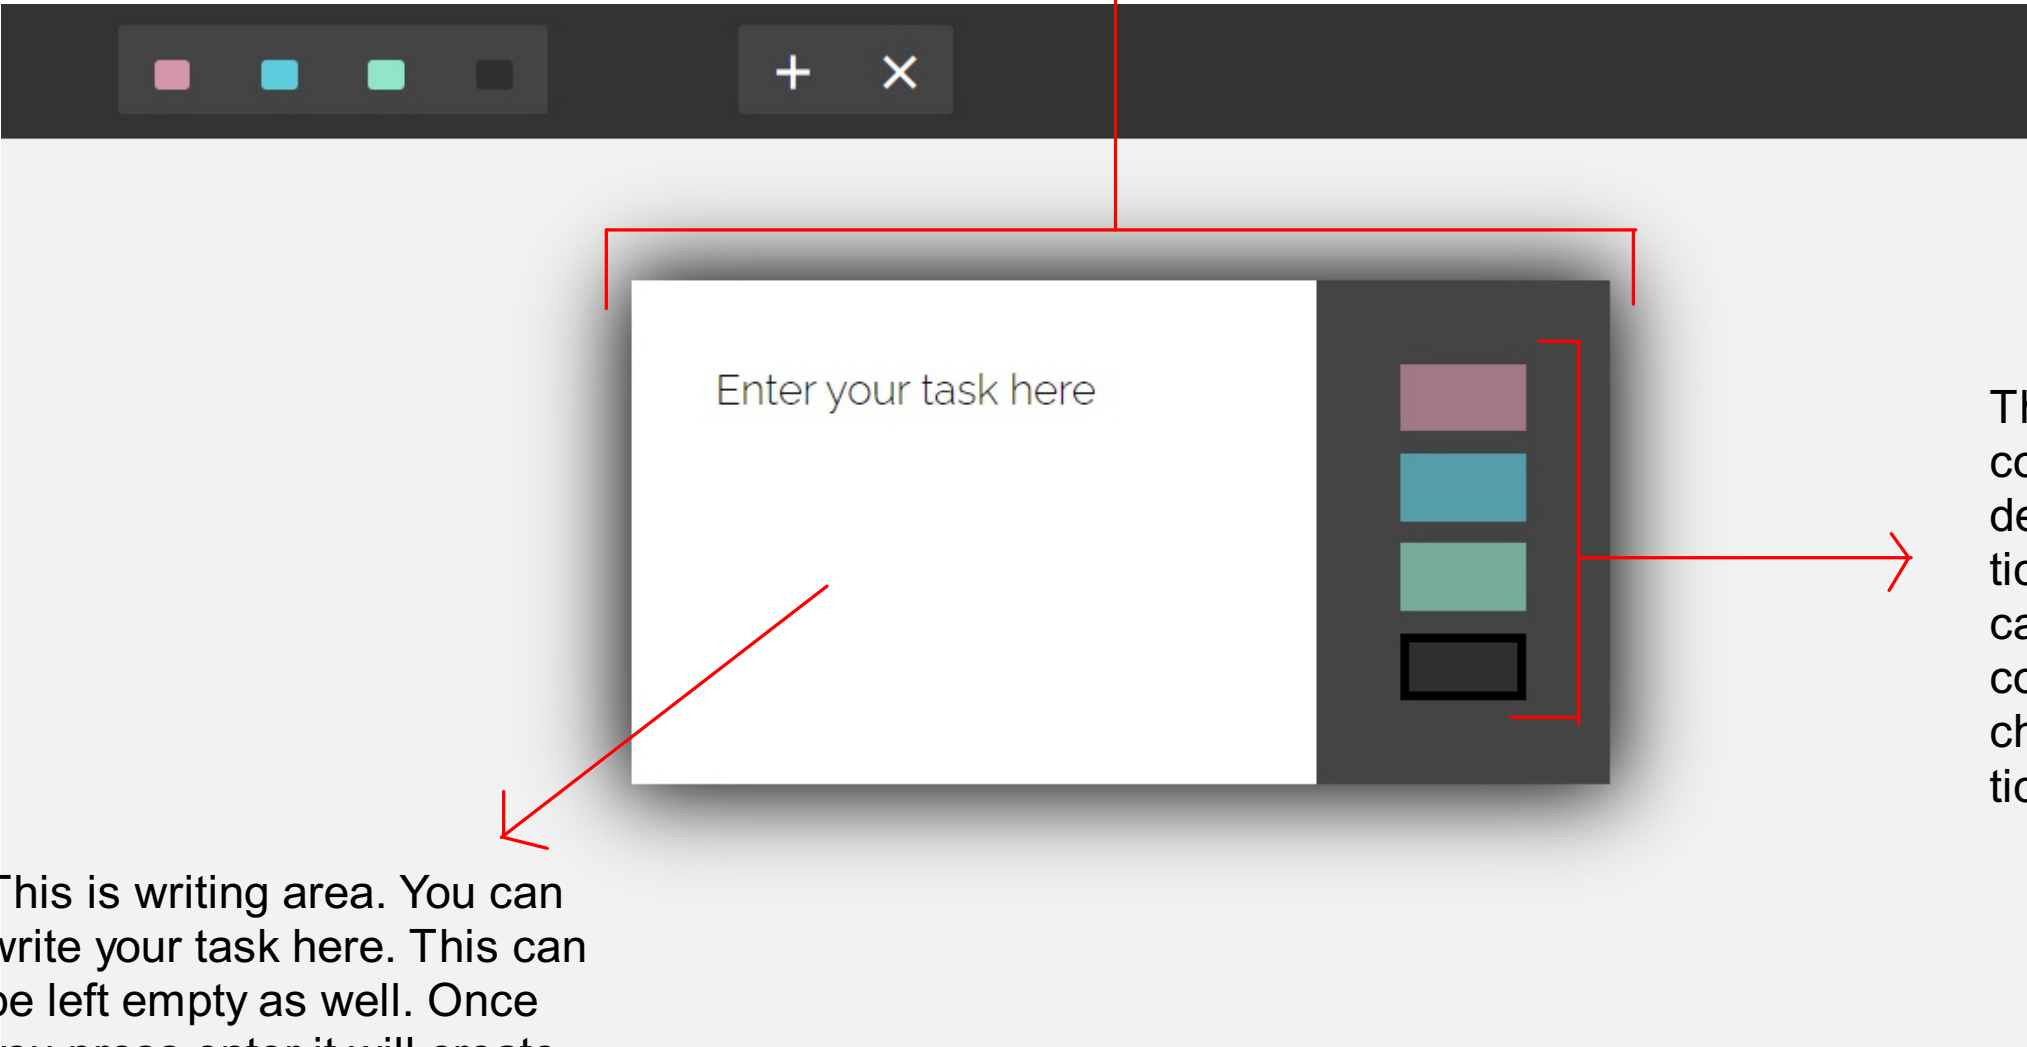

This is how Jira-
Clone looks on initial
open.

These are called
action buttons

On click of this delete state
is set to true and after that if
you click on any ticket it will
be deleted

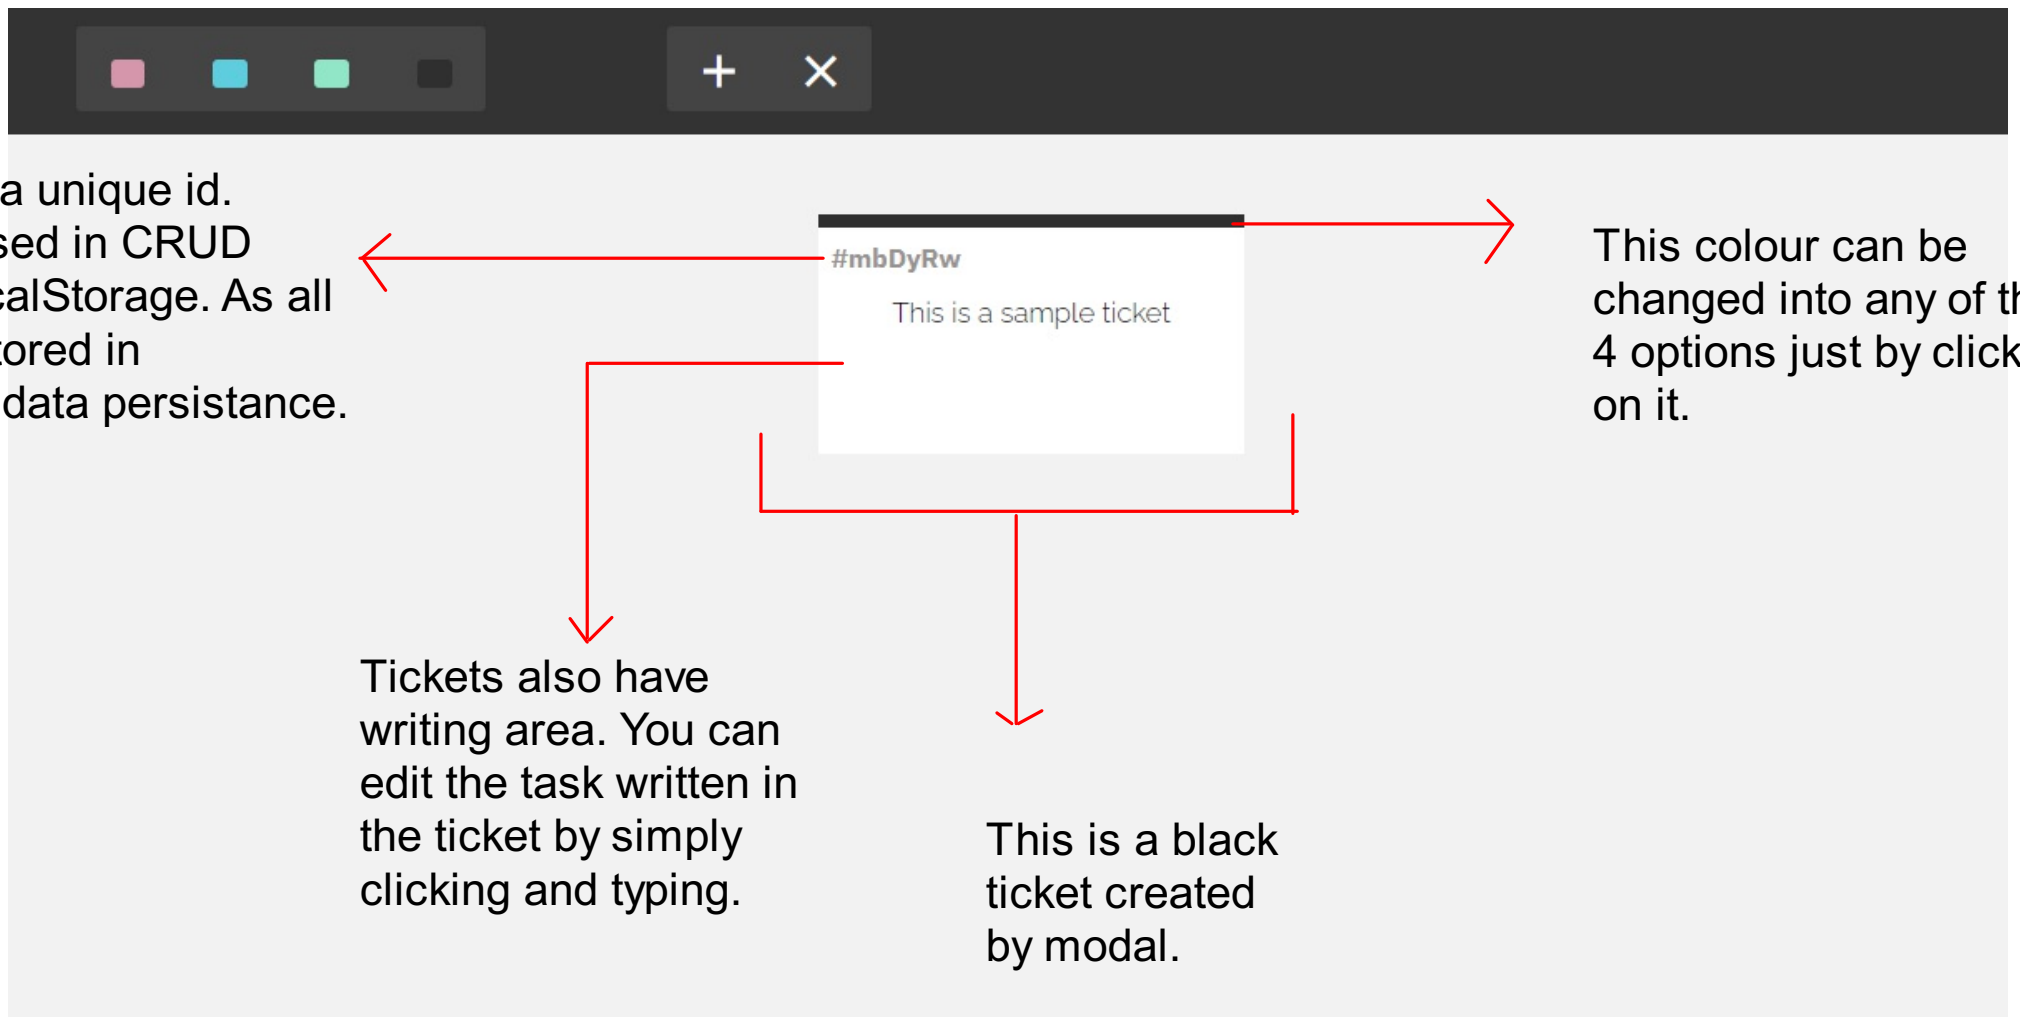

This is a modal that opens up on click of the add action button

These are ticket color options. By default colour of ticket is black. You can choose any colour. If no color is chosen a black ticket is created.

This is writing area. You can write your task here. This can be left empty as well. Once you press enter it will create a ticket.

#mbDyRw

This is a sample ticket

#Sby0h7

This is a sample ticket

#bBSnlE

This is a sample ticket

We can have multiple tickets of different colours at the same time if no filter is selected

#uNl5jU

This is a sample ticket

#WFQ7Li

This is a sample ticket

#A6Edsk

This is a sample ticket

#Sby0h7

This is a sample ticket

#bBSnlE

This is a sample ticket

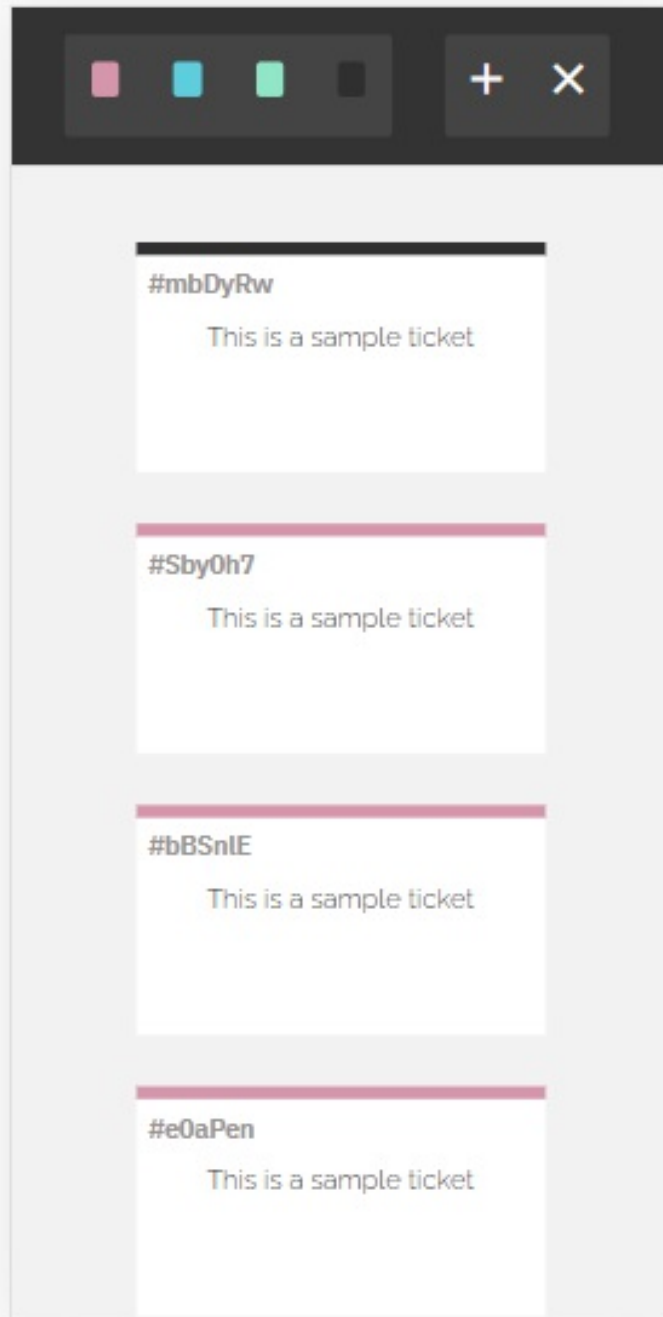

#e0aPen

This is a sample ticket

Here pink filter
is selected

We can get a specific color
tickets by selecting the colour
filter.

PIXEL 2 XL

The app is responsive in mobile, tab and desktop screen sizes.
